

AgapeVows.com - User Guide for Uploading Masked Government ID

To ensure user authenticity and platform safety, AgapeVows requires all users to upload a masked version of a valid government ID, in compliance with the Indian IT Act 2000. Your ID information is securely handled and will not be shared with any third party. This guide outlines how to correctly mask and upload your ID while safeguarding your sensitive details. Masking your ID helps protect it from misuse, even in the unlikely event of unauthorized access.

Accepted ID Types

- Aadhaar Card
- Passport

What is Masking?

Masking means hiding sensitive personal information such as full ID numbers. Only the last 4 digits should be visible.

Masking Instructions

1. Take a clear photo or scan of your ID.
2. Use any editing tool on your phone or computer to cover sensitive numbers.
3. Ensure only last 4 digits are visible.
4. You can also put a piece of paper to cover the sensitive numbers while taking a photo and upload the photo.
4. Do NOT hide your name and photo.
5. Save and upload the file on AgapeVows ID upload section.

Important Notes

- Do NOT upload unmasked IDs.
- Ensure the image is clear and readable.
- Files with improper masking may be rejected.
- Do NOT upload fake IDs. If found, your account may be suspended and banned from AgapeVows.

Examples of Masked IDs

Masked Aadhaar:

Only last 4 digits should be visible
